Advantages and Disadvantages of Shopping Online

People shop online for all kinds of reasons. But not everyone thinks this is a good idea.

One of the main advantages is that you can shop 24 hours a day for any type of product without having to spend your time and money to travel between several different shops.

It is a good thing for people who are old or ill and they cannot leave their homes. And for many people who have trouble going shopping during their opening hours because they work the same hours as shop opening times and mothers with young children who has nobody to look after them. Other advantage of shopping online is that goods are often cheaper.

But on the other hand the main problem I see is that you buy the items through photographs and description and sometimes the products aren't always as good as they look, or it is difficult to check the right size of cloths.

Even though shopping online can make life easy for some people, I am not in favour because, for me, there's nothing like visiting my favourite shops.
